

Smaller Class Sizes Reporting Template

Notes:

Average Class Size: For each grade level, include both regular and blended classes in calculating the average class size. **Blended classes should be calculated in the average for their lowest grade. For example, for Grade 1, if you have 1 regular class and 1 blended class (mix of Grade 1 and Grade 2 students), include both as Grade 1 classes while calculating the average. Do not include the Grade 2 students in that blended class again while calculating the average class size for Grade 2 (no double counting).**
